Engineering *for* Better Health

OVERVIEW

SeKON has built a reputation over two decades as a trusted advisor to civilian and defense clients. Our healthcare clients cover a broad spectrum and have benefited from our thought leadership and expertise in leading-edge technology – improving operations on mission-critical programs, proactively preparing for legislative impacts, leading organizational transformation, and understanding electronic health records (EHR). We are committed to providing the convergence of the right talent, tools, and processes to solve problems that matter, to achieve mission goals, and to make a measurable impact on organizations and the stakeholders they serve.
